Assessment instructions for learners

Field	Detail
Course	Level 1 — General Worker Safety Induction
Assessment	Final written assessment, 20 questions
Time allowed	45 minutes
Total marks	20 (one mark per question)
Pass requirement	80% — 16 of 20 marks
Conditions	Individual work, closed book. You may ask the invigilator to read a question aloud. Answer every question; there is no negative marking.
Reassessment	One reassessment (parallel form) is included in the course fee.

The diagnostic exercise at the start of the day is not marked for pass or fail; it guides the facilitator's emphasis. The final assessment below is marked. Write short answers in the spaces provided; for multiple-choice questions circle or clearly write the letter.

Final written assessment

1. Define a hazard.

Answer:

2. Name the two lenses used to analyse how workplace incidents happen.

Answer:

3. The principal Namibian law placing safety duties on employers is…

A. The Labour Act, 2007 (Act No. 11 of 2007)
B. The Mine Health and Safety Act
C. Company standing orders

4. Government Notice 156 of 1997 regulates…

A. Traffic on construction sites
B. The health and safety of employees at work
C. Tax on safety equipment

5. Injuries at work may be compensated through…

A. The Employees' Compensation Fund administered by the Social Security Commission

B. The worker's own medical aid only

C. No fund exists in Namibia

6. The OSH Bill drafted in 2024 is…

A. Fully in force

B. Pending enactment and not yet law

C. Only for mines

7. Reporting hazards and near misses is…

A. A legal duty of every employee

B. Optional good practice

C. The safety officer's job only

8. Name the six hazard categories.

Answer:

9. SLAM stands for…

A. Stop, Look, Assess, Manage

B. Slow, Lift, Arrange, Move

C. Safety, Law, Audit, Method

10. Write a one-sentence hazard report for a frayed extension cable in the staff kitchen.

Answer:

11. In the hierarchy of control, PPE sits…

A. First, before all other controls

B. Last, after elimination, substitution, engineering and administrative controls

C. In the middle

12. Wet cutting of concrete instead of dry cutting with a dust mask is an example of…

A. An engineering control

B. PPE

C. Elimination

13. A hard hat that has taken a significant impact but shows no crack must be…

A. Kept in use

B. Replaced

C. Repaired with tape

14. Name two administrative controls for outdoor work in the Namibian sun.

Answer:

15. The four answers every emergency plan must give are…

A. Alarm, exit route, assembly point, person in charge
B. Cost, supplier, installer, inspector
C. Email, phone, fax, website

16. After evacuation you may re-enter the building when…

A. The alarm stops sounding
B. The person in charge declares the all-clear
C. You have checked visually that there is no smoke

17. Water must never be used on…

A. Solid fuel fires
B. Flammable liquid fires
C. Textile fires

18. TILE stands for…

A. Task, Individual, Load, Environment
B. Time, Injury, Load, Effort
C. Training, Inspection, Layout, Equipment

19. In a correct lift, the work is done by…

A. The back muscles
B. The leg muscles
C. The shoulders

20. List any two workstation adjustments that reduce strain.

Answer:

End of assessment. Check you have answered all twenty questions before handing in.

Formative practical: hazard-spotting observation

Completed during Module 3 and informally during the day. Not marked for pass or fail; recorded as observed / not yet observed on the learner's record. The facilitator observes each learner at least once:

Observation point	Observed	Notes
Labels hazards by category during the hazard hunt	☐	

Observation point	Observed	Notes
Writes a four-part hazard report (what, where, who, fix)	☐	
Inspects PPE items correctly before the exercise	☐	
Applies SLAM unprompted during practical activities	☐	
Contributes at least one workplace example in discussion	☐	

Learner name: _____ Facilitator: _____
