How to use this workbook

This workbook is your working document for the day. Complete it as the course runs; your facilitator will tell you when each sheet applies. Write in it freely. At the end of the day it goes home with you together with your manual, so make it useful to your own workplace.

Write your details on the cover sheet so the workbook can be returned if misplaced.

Module 1 What occupational safety is and why it matters

Guided notes — complete during the session:

In one sentence, what is the single most useful idea in this module for your own job?

Key terms I want to remember:

LEARNER ACTIVITY

My near miss

Describe a near miss you have seen or experienced (facts only: what, where, what could have gone wrong):

KNOWLEDGE CHECK

What occupational safety is and why it matters — self-check

1. In one sentence each, define hazard and risk.
2. Which law places the main duty on Namibian employers to protect employees at work?
   A. The Labour Act, 2007 (Act No. 11 of 2007)
   B. The Namibian Constitution only
   C. Company policy
3. A scaffold plank falls past a worker and hits nobody. This is best described as…
   A. Nothing, since nobody was hurt
   B. A near miss that should be reported
   C. A safe practice
4. Name the two lenses used to analyse how incidents happen.
5. Which ministry's inspectors enforce occupational safety in Namibian workplaces?
   A. Ministry of Health and Social Services
   B. Ministry of Labour, Industrial Relations and Employment Creation
   C. Ministry of Mines and Energy

Module 2 Legal duties of employers and employees

Guided notes — complete during the session:

In one sentence, what is the single most useful idea in this module for your own job?

Key terms I want to remember:

LEARNER ACTIVITY

Duty sorting — my answers

For each statement read out by the facilitator, write E (employer duty), W (worker duty) or S (shared):

1. _____ → ____
2. _____ → ____
3. _____ → ____
4. _____ → ____
5. _____ → ____
6. _____ → ____
7. _____ → ____
8. _____ → ____

KNOWLEDGE CHECK

Legal duties of employers and employees — self-check

1. Who pays for personal protective equipment required under the law?
   A. The employee, deducted from wages
   B. The employer
   C. Shared equally
2. Name the fund that compensates Namibian workers injured at work, and the commission that administers it.
3. Reporting a near miss is…
   A. Optional good manners
   B. A legal duty of the employee
   C. Only for supervisors
4. The OSH Bill of 2024 is currently…
   A. In force
   B. Pending enactment, not yet law
   C. Repealed
5. List any three of the employer's core duties listed in this module.

Module 3 Hazard identification and reporting

Guided notes — complete during the session:

In one sentence, what is the single most useful idea in this module for your own job?

Key terms I want to remember:

3.W Hazard hunt scenario sheets

Scenario A — bakery, Omaruru

A small bakery operates from 04:30. The proofer sits next to a deep-fat fryer. Flour dust hangs in the air near the mixer. The floor near the sink is permanently damp. A 16-year-old assistant lifts 25 kg sacks of flour from a pallet on the floor to a waist-high bin, twice per delivery, four deliveries a week. The fire extinguisher on the wall was last serviced six years ago. The back door, which also serves as the delivery entrance, is propped with a mop bucket.

Hazard found	Category	Report first? (Y/N)	Why

Scenario B — cattle post, Otjozondjupa

Solar panels charge a battery bank in a shed that also stores veterinary medicines and a petrol generator. Wires from the panels enter the shed through a hole in the wall. Two workers dip cattle in a plunge dip every fortnight; the dip chemical is decanted from a 20-litre drum with a cracked lid into an unmarked bucket. The nearest clinic is 60 km. The bakkie that would carry an injured worker has two smooth tyres. Long sleeves are worn against the sun; gloves are not.

Hazard found	Category	Report first? (Y/N)	Why

Scenario C — office courtyard, Windhoek

A four-office suite surrounds a courtyard used for tea breaks. Cleaning chemicals are stored under the kitchen sink in reused cooldrink bottles. The courtyard tree shades a bench directly beneath a wall-mounted air conditioner that drips onto the paving, leaving a green algal patch. The electric gate has a manual override nobody has been shown. The first-aid box contains expired burns dressings and one elastic bandage. Two staff share a workstation set up for the taller of the two.

Hazard found	Category	Report first? (Y/N)	Why

Our two best report sentences:

KNOWLEDGE CHECK

Hazard identification and reporting — self-check

1. Name the six hazard categories.
2. What does SLAM stand for?
3. A truck reverses in a yard with no banksman and no reverse alarm. Which two categories does this fall under?
4. Write a one-sentence hazard report for a frayed extension cable in a staff kitchen.
5. Where does a hazard report go first in the standard route?
   A. The regional labour inspector
   B. The immediate supervisor
   C. The local newspaper

Module 4 Personal protective equipment: what, when, how

Guided notes — complete during the session:

In one sentence, what is the single most useful idea in this module for your own job?

Key terms I want to remember:

4.W PPE inspection worksheet

Item	Checkpoints	Finding	Verdict (serviceable / clean / replace)
Hard hat	Shell cracks, deep scratches, suspension, date		
Safety boots	Sole condition, toecap, lacing, sole penetration		
Hi-vis vest	Reflective strips, fabric tears, closures		

Two heat-control actions for my own job:

KNOWLEDGE CHECK

Personal protective equipment: what, when, how — self-check

1. List the hierarchy of control in the correct order.
2. Why does PPE sit last in the hierarchy?
3. Which control is wet cutting of concrete blocks, instead of dry cutting with a dust mask?
   A. PPE
   B. Engineering control
   C. Elimination
4. Name two early signals of heat exhaustion.
5. A hard hat receives a significant impact but shows no crack. What should happen?
   A. Continue use, it did its job
   B. Replace it
   C. Paint over the mark

Module 5 Emergency procedures

Guided notes — complete during the session:

In one sentence, what is the single most useful idea in this module for your own job?

Key terms I want to remember:

5.W My escape map

Sketch your workplace: workstation, two nearest exits, assembly point, extinguisher, first-aid kit, roll-call person. Note disagreements with your partner's map.

My workplace emergency numbers and first-aiders:

KNOWLEDGE CHECK

Emergency procedures — self-check

1. Name the four answers every emergency plan must give.

2. You are at the assembly point and remember your phone at your desk. The alarm is still sounding. What do you do?

   A. Run in quickly for it

   B. Stay out and report to roll call

   C. Ask a colleague to fetch it

3. Which extinguishing media are suitable for a flammable-liquid fire?

   A. Water

   B. Foam, dry powder or carbon dioxide

   C. Any available

4. What does PASS stand for?

5. When calling emergency services about an injury, name three pieces of information you must give.

Module 6 Manual handling and basic ergonomics

Guided notes — complete during the session:

In one sentence, what is the single most useful idea in this module for your own job?

Key terms I want to remember:

6.W Manual handling checklist and lift observation

Observe one partner's floor-height lift. Tick each point observed:

☐ Feet hip-width, one slightly forward

☐ Close to the load before lifting

☐ Knees bent, back in natural alignment

☐ Firm grip with both hands

☐ Legs do the work, no jerking

☐ Feet move instead of twisting the spine

☐ Load set down the same way

☐ Decision checked first (TILE, help, trolley)

Group judgements: cement bag → _____ ; glass sheet → _____

KNOWLEDGE CHECK

Manual handling and basic ergonomics — self-check

1. What does TILE stand for?
2. Which muscles should do the work in a correct lift?
   A. The back muscles
   B. The leg muscles
   C. The arm muscles
3. Name two adjustments that improve a computer workstation.
4. A task needs a 40-kilogram bag moved twenty metres. What is the correct decision?
   A. One-person lift with a straight back
   B. Team lift or mechanical aid
   C. Drag it to save time
5. Why are short, frequent breaks better than long, rare ones for repetitive work?

Revision quiz

Complete without looking back. Answers are discussed in class; this is not the final assessment.

1. Name the six hazard categories.

2. State the employer's three core duties that you consider most important in your own job, and why.

3. Write the four lines of a hazard report for something in this training venue.

4. Your shift ends in a warehouse and a stacked pallet leans over the walkway. What do you do, in order?

5. The fire alarm sounds while you are on the first floor with a visitor. List your actions in order.

6. A colleague cuts a hand on a broken glass. What do you do in the first two minutes?

7. Explain to a new colleague why PPE is the last choice, not the first.

8. Use TILE on your own worst task at work and note one fix per factor.

My action plan

Three commitments for your first week back at work:

Signature: _____ Date: _____
