How to use this workbook

This workbook collects the working sheets for the five days: guided notes, the group exercises, your risk assessment, your investigation practice, your toolbox talk preparation and your walkthrough report. Complete sheets as the course runs; several become assessment evidence. Name it on the cover and keep it after the course as the start of your own site file.

Name: _____ Employer / site: _____ Cohort dates: _____

Module 1 The Namibian occupational safety framework in depth

The two ideas from this module I will use first:

Terms I must be able to define by Friday:

Module 2 Hazard identification and risk assessment (HIRA)

The two ideas from this module I will use first:

Terms I must be able to define by Friday:

Module 3 Incident investigation and reporting

The two ideas from this module I will use first:

Terms I must be able to define by Friday:

Module 4 PPE inspection and management

The two ideas from this module I will use first:

Terms I must be able to define by Friday:

Module 5 Emergency preparedness and fire safety

The two ideas from this module I will use first:

Terms I must be able to define by Friday:

Module 6 First aid awareness

The two ideas from this module I will use first:

Terms I must be able to define by Friday:

Module 7 Construction-site safety

The two ideas from this module I will use first:

Terms I must be able to define by Friday:

Module 8 Toolbox talks and safety meetings

The two ideas from this module I will use first:

Terms I must be able to define by Friday:

Module 9 Safety files and site documentation

The two ideas from this module I will use first:

Terms I must be able to define by Friday:

Module 10 The practical site walkthrough

The two ideas from this module I will use first:

Terms I must be able to define by Friday:

Risk assessment worksheet (Module 2 exercise and assessment evidence)

Activity / area assessed: _____ Assessors: _____
Date: _____

Hazard statement	L x S = Score	Controls (hierarchy order)	Residual	Owner / date

Hazard statement	L x S = Score	Controls (hierarchy order)	Residual	Owner / date

Review triggers for this assessment: _____

Incident investigation worksheet (Module 3 exercise)

Scenario: acid drum leak, battery depot. First-hour action list:

_____

Evidence plan: physical / documentary / human:

_____

Five-whys chain:

Why 1: _____

Why 2: _____

Why 3: _____

Why 4: _____

Why 5: _____

Corrective action	Owner	Date	Verified by / when

Scaffold inspection checklist (Module 7 exercise)

Photograph / scaffold reference: _____ Inspector: _____ Date: _____

☐ Base plates and sole boards on firm, level ground — Finding: _____

☐ Standards plumb; ledgers level; joints pinned — Finding: _____

☐ Ties present per design and not removed by others — Finding: _____

☐ Platforms fully boarded; no gaps or unsecured boards — Finding: _____

☐ Guardrails and toe boards on all working platforms — Finding: _____

☐ Safe access: secured ladders extending sufficiently — Finding: _____

☐ Components compatible, undamaged, same system — Finding: _____

☐ Load signage present; not overloaded — Finding: _____

☐ Inspection tag current, signed by competent person — Finding: _____

☐ Exclusion below where work is active overhead — Finding: _____

Verdict: ☐ Fit for use ☐ Rectify then re-inspect ☐ Stop work (red tag)

Toolbox talk preparation and delivery sheet (Module 8)

Assessed talk topic: _____

The one hazard (specific, stated as a hazard statement):

How we work it safely (three steps in plain words):

Who checks, and when:

My closing question to the crew:

Safety file contents checklist (Module 9)

- ☐ Index and document-control sheet (versions, dates, distribution)
- ☐ Safety policy and organisation, roles named
- ☐ Risk assessments, current, with review triggers
- ☐ Safe work procedures for high-risk tasks
- ☐ Training register with certificates and expiry tracking
- ☐ Inspection records: scaffold, plant, excavations, PPE
- ☐ Incident and near-miss records with investigations
- ☐ Emergency plan, evacuation diagrams, drill debriefs
- ☐ PPE matrix and issue records
- ☐ Plant and equipment list with maintenance evidence
- ☐ Permit-to-work book, used and closed
- ☐ Contractor and visitor records
- ☐ Correspondence with clients and authorities

Walkthrough report sheet (Module 10 assessment evidence)

Site / area: _____ Inspector: _____ Date / time: _____

Read before walking (last report, near misses, open permits — note anything that changed the plan):

Finding (location, observation)	Hazard created	Class (stop / fix / monitor)	Action, owner, date

Good practice observed (at least one):

Revision quiz

1. Summarise the Namibian occupational safety framework in five sentences, naming the instruments correctly.

2. Score these hazards on the matrix and justify: (a) unguarded 2.8 m mezzanine edge, stacking task; (b) forklift in a busy aisle without separation, near-miss last week.

3. Write the first-hour action list for: worker's hand caught in an unguarded roller, conscious, heavy bleeding.

4. A harness arrested a fall yesterday. What happens today, on paper and physically?

5. Plan a five-minute toolbox talk for a crew about to use a new bench grinder. Write the five elements.

6. Draft the permit conditions for hot work near a flammable store: list six.

7. Your walkthrough finds an untagged scaffold, a blocked exit, and a crew working to an out-of-date procedure. Classify each and state your immediate actions.

8. What is the difference between an improvement notice and a prohibition notice, and who issues them?

My action plan

Three commitments for my site in the first month after this course:

Signature: _____ Date: _____
