How to use this workbook

The workbook carries the working sheets for the eight modules, the two assignment briefs' working drafts, and your revision notes. Several sheets become assignment evidence. Name it, use it, and keep it: the gap-analysis sheet and the audit sheets in particular tend to start professional filing systems.

Name: _____ Organisation / role: _____ Cohort dates: _____

Module 1 SHEQ management systems and ISO 45001 principles

What I will change in my organisation first, from this module:

Module 2 Construction safety requirements in depth

What I will change in my organisation first, from this module:

Module 3 Mining safety requirements

What I will change in my organisation first, from this module:

Module 4 Occupational hygiene and environmental monitoring

What I will change in my organisation first, from this module:

Module 5 Contractor management

What I will change in my organisation first, from this module:

Module 6 Root-cause investigation: ICAM fundamentals

What I will change in my organisation first, from this module:

Module 7 Auditing and inspection techniques

What I will change in my organisation first, from this module:

Module 8 Training of trainers

What I will change in my organisation first, from this module:

Gap-analysis worksheet (Module 1 — management-system assignment)

Organisation / scope assessed: _____ Assessors: _____ Date: _____

Clause family	Requirement focus	Evidence found / absent	Gap risk (H/M/L)
Context	Issues and parties defining scope		
Leadership	Commitment, policy, roles, consultation		
Planning	HIRA, legal register, objectives, programmes		
Support	Resources, competence, awareness, communication, documents		
Operation	Operational control, change, procurement, emergencies		
Evaluation	Monitoring, internal audit, management review		
Improvement	Incident, nonconformity, corrective action		

Top two gaps and the twelve-month programme (owners, resources, measurement):

Method-statement repair sheet (Module 2)

Step in sequence	Hazards at this step	Controls	Competency required	Hold point (who signs)

Code-of-practice skeleton (Module 3)

Assigned hazard: _____

Purpose and scope:

Definitions:

Hazard description and risk basis:

Control standards:

Roles and responsibilities:

Training requirements:

Inspection and records:

Review triggers:

Hygiene survey commissioning brief (Module 4)

Population and shifts, sampling strategy, methods and analysis, OELs with sources, reporting requirements including TWA treatment, expected hierarchy-ordered recommendations:

Prequalification scoring sheet (Module 5)

Evidence area	Weight	Contractor A	Contractor B	Contractor C
Policy with named accountable person	10			
Training/competence records (sampled)	25			
Incident history with explanations	20			
Equipment certification	15			
References from comparable work	15			
Verification calls made	15			
Total	100			

The five contract safety clauses I would insist on:

ICAM investigation worksheet (Module 6)

Timeline (with times):

Analysis by factor group — organisational / task and environmental / individual actions / preconditions:

Finding (causal factor + evidence)	System it lives in	Recommendation, owner, date, verification

Audit conversion sheet and findings log (Module 7 — practical audit assignment)

Procedure / standard audited: _____ Audit date: _____

Requirement (as written)	Evidence question	Sample chosen	Evidence found

Requirement (as written)	Evidence question	Sample chosen	Evidence found

Finding (requirement, evidence, gap)	Grade	Root cause (auditee)	Action, owner, date

Training segment plan (Module 8)

Objective (observable behaviour):

Formative check that proves it:

Session plan (timings, activities, materials):

Peer feedback received (what worked / what to try next):

My action plan

Three system changes I will lead in the next six months:

Signature: _____ Date: _____
