TEXTBOOK · LEVEL 5

National Vocational Certificate in OHS

Modular — 8 modules · 24 credits · Entry: Level 3 or relevant workplace competence

Oryx Institute · Windhoek, Namibia · info@oryxinstitute.org

Oryx Institute · Windhoek, Namibia

NQF LEVEL 4

National Vocational Certificate in Occupational Health & Safety (Safety Officer)

Anchors: NTA Unit Standard IDs 843, 844, 848, 849, 850, 851, 852, 853, 859, 2061.

Formal vocational delivery and pre-accreditation submission: programmes commence only after NTA provider registration has been granted; NQA accreditation is pursued in parallel and will be announced on the public register. This pack is a pre-accreditation curriculum draft built on the Oryx template system.

Programme outcomes

On completion of this level the learner can plan, execute and supervise the module outcomes below under normal workplace supervision, and produce the associated records to audit standard.

MODULES

Develop and Monitor Procedures to Safely Control Work Operations

NTA reference: 848 & 849

PTW systems and high-risk work control: confined space, heights, hot work, lifting.

The permit-to-work is the last administrative barrier before high-risk energy meets people. Learners draft and audit PTWs for confined space, hot work, heights and electrical isolation, then monitor field compliance against the written condition set, learning where permits decay and why conflict detection belongs in the system, not the supervisor's memory.

Practical video recording scheduled — the online reader reserves a demonstration slot for this module.

Supervise the Health, Safety and Welfare of Employees

NTA reference: 850

Ergonomics, medical surveillance, welfare facilities, fatigue management.

Supervising welfare means walking the workplace with a hygiene eye: workstation fit, manual handling reality, sanitation, drinking water, fatigue patterns and medical surveillance triggers. Learners build a supervision routine that captures early indicators before they become claims.

Practical video recording scheduled — the online reader reserves a demonstration slot for this module.

Develop and Maintain Organisational Competence in H&S

NTA reference: 851 & 852

Skills matrices, training needs analysis, statutory appointments and registers.

Competence is a managed asset. This module builds the skills matrix from statutory and business requirements, runs the training needs analysis, and maintains the appointment registers that Namibian enforcement expects to see current and signed.

Practical video recording scheduled — the online reader reserves a demonstration slot for this module.

Develop Effective H&S Communication Systems & Safety Culture

NTA reference: 853 & 859

Committees, alerts, consultation structures, culture measurement.

Safety communication fails as broadcast; it works as loop. Learners design committee structures, alert systems and escalation paths, then measure culture with leading indicators rather than poster counts.

Practical video recording scheduled — the online reader reserves a demonstration slot for this module.

Install, Inspect and Maintain Safety Systems and Security Interlocks

NTA reference: 2061

Guarding, interlocks, LOTO systems, inspection and test regimes.

Interlocks and guarding only protect while they function. Learners install, inspect and test machine safety systems, document defeats as major non-conformances, and maintain the inspection regime that proves integrity over time.

Practical video recording scheduled — the online reader reserves a demonstration slot for this module.

Emergency First Aid & Fire Response Coordination

NTA reference: 843/844

Coordinating first aiders and fire teams; drills and handover to services.

Coordinating first aid and fire response means drills with timing objectives, equipment readiness checks, and a handover to emergency services that carries what burns, who is missing and what is isolated.

Practical video recording scheduled — the online reader reserves a demonstration slot for this module.

Occupational Hygiene Inspection & PPE Programme Administration

NTA reference: 852

Survey basics, exposure records, PPE programme design and audit.

The hygiene inspection walk becomes a programme: survey scheduling, exposure records, and the PPE programme designed from hazard data with issue registers, fit records and retirement criteria that survive an audit.

Practical video recording scheduled — the online reader reserves a demonstration slot for this module.

Contractor SHE Pack Compilation & Site Compliance Inspections

NTA reference: 848

File compilation, gate checks, scheduled and blitz inspections.

The contractor gate decides site safety before the first shift. Learners compile and vet SHE packs, run mobilization gate checks, and schedule compliance inspections that catch drift early.

Practical video recording scheduled — the online reader reserves a demonstration slot for this module.

ASSESSMENT

Assessment framework

Per-module papers plus portfolio of evidence: PTW audit, competence matrix, contractor file, site inspection report.

L4-M1	Module paper + portfolio evidence	Equal
L4-M2	Module paper + portfolio evidence	Equal
L4-M3	Module paper + portfolio evidence	Equal
L4-M4	Module paper + portfolio evidence	Equal
L4-M5	Module paper + portfolio evidence	Equal
L4-M6	Module paper + portfolio evidence	Equal
L4-M7	Module paper + portfolio evidence	Equal
L4-M8	Module paper + portfolio evidence	Equal

Certification: Attendance and Completion certificates are issued internally; Accredited certification follows only after NQA status is granted for this qualification.
