TEXTBOOK · LEVEL 5

National Vocational Diploma in OHS

Modular — 8 modules · 32 credits · Entry: Level 4 or SHEQ practitioner experience

Oryx Institute · Windhoek, Namibia · info@oryxinstitute.org

NQF LEVEL 5

National Vocational Diploma in OHS Management (SHEQ Manager & Lead Investigator)

Anchors: NTA Unit Standard IDs 854, 855, 856, 857, 858, 860, 1929.

Formal vocational delivery and pre-accreditation submission: programmes commence only after NTA provider registration has been granted; NQA accreditation is pursued in parallel and will be announced on the public register. This pack is a pre-accreditation curriculum draft built on the Oryx template system.

Programme outcomes

On completion of this level the learner can plan, execute and supervise the module outcomes below under normal workplace supervision, and produce the associated records to audit standard.

MODULES

Design and Implement an Enterprise Health & Safety Programme

NTA reference: 854

ISO 45001 architecture, implementation roadmaps, resourcing.

Designing an enterprise programme starts with context and leadership, moves through risk register architecture and objective setting, and lands as an implementation roadmap with owners, budgets and review points that top management signs.

Practical video recording scheduled — the online reader reserves a demonstration slot for this module.

Advanced Quantitative Workplace Risk Assessment

NTA reference: 855

BowTie, FMEA, HAZOP fundamentals, quantitative criteria.

Quantitative risk moves beyond the matrix: BowTie barrier modelling, FMEA scoring, HAZOP guide-word studies and the discipline of documenting assumptions so the numbers can be challenged.

Practical video recording scheduled — the online reader reserves a demonstration slot for this module.

Develop and Conduct H&S Audit Systems & Management Reviews

NTA reference: 856 & 860

Audit programme design, lead-audit practice, review governance.

Lead auditors design the audit programme by risk, brief auditors for independence, run evidence-based fieldwork and drive findings through corrective action to management review without losing objectivity.

Practical video recording scheduled — the online reader reserves a demonstration slot for this module.

Develop and Command Multi-Agency Emergency Response Systems

NTA reference: 857

Scenario planning, mutual aid, crisis command architecture.

Multi-agency response is negotiated in peacetime: scenario plans, mutual aid agreements, command board architecture, and joint exercises that test the seams between organizations.

Practical video recording scheduled — the online reader reserves a demonstration slot for this module.

Investigate and Evaluate Complex Workplace Incidents & Statutory SSC Claims

NTA reference: 858

ICAM lead investigator practice, evidence, claims interfaces.

Complex investigations demand ICAM leadership: evidence strategy, team management, organizational analysis and the Social Security Commission claims interface, ending in findings that change the system rather than the scapegoat.

Practical video recording scheduled — the online reader reserves a demonstration slot for this module.

Manage Health and Safety on Construction, Civil & Mining Projects

NTA reference: 1929

Project HSE planning, contractor ecosystems, sector interfaces.

Project HSE management on construction, civil and mining works means contractor ecosystems, interface risk and the paperwork spine — files, appointments, registers — kept alive across a moving site.

Practical video recording scheduled — the online reader reserves a demonstration slot for this module.

Namibian Administrative & Labour Law, Inspector Notices, Appeals & Corporate Liability

NTA reference: 859

Enforcement powers, notices, appeals, directors' liability.

Administrative law is the SHEQ manager's arena: inspector powers, improvement and prohibition notices, appeal routes, and the corporate liability exposure that reaches the boardroom.

Practical video recording scheduled — the online reader reserves a demonstration slot for this module.

Research Methods & Applied OHS Capstone Project

NTA reference: 860

Applied research design and a supervised capstone in the workplace.

The capstone applies research methods to a live OHS problem: problem statement, literature, method, ethics, analysis and a defended recommendation that the host organization can implement.

Practical video recording scheduled — the online reader reserves a demonstration slot for this module.

ASSESSMENT

Assessment framework

Module examinations, lead-audit practical, ICAM investigation portfolio, capstone project with defence.

L5-M1	Module paper + portfolio evidence	Equal
L5-M2	Module paper + portfolio evidence	Equal
L5-M3	Module paper + portfolio evidence	Equal
L5-M4	Module paper + portfolio evidence	Equal
L5-M5	Module paper + portfolio evidence	Equal
L5-M6	Module paper + portfolio evidence	Equal
L5-M7	Module paper + portfolio evidence	Equal
L5-M8	Module paper + portfolio evidence	Equal

Certification: Attendance and Completion certificates are issued internally; Accredited certification follows only after NQA status is granted for this qualification.
