WELCOME

SafeMan Workplace First Aid Responder (Level 1 Equivalent)

SafeMan Workplace First Aid Responder (Level 1 Equivalent) — Theory + Practical Drills. This SafeMan course is engineered for corporate audit readiness against: NTA Unit Std 843 & 844; GN 156 Reg. 228; ISO 45001 Cl. 8.2.

REGULATORY DISCLOSURE — READ FIRST

SafeMan™ is a proprietary inter-organizational safety management and operational competency benchmark developed by Oryx Institute (safeman.oryxinstitute.org). Courses are engineered in alignment with ISO 45001:2018, ISO 14001:2015, ISO 31000, ILO-OSH guidelines, and pre-referenced against Namibia Training Authority (NTA) Unit Standards and Namibian Government Notice 156 of 1997 for corporate audit readiness. SafeMan credentials verify industry competency and attendance between organizations and are non-NQA credit-bearing.

How to use this module pack

Work through the modules in order. Each module states its focus and the key points you are expected to carry into practice. Diagrams referenced as web assets accompany the online reader at safeman.oryxinstitute.org. After the modules, sit the knowledge check: 12 questions, pass mark 70%, closed book.

This is a practicum course: after passing the knowledge check you must complete the assessor practicum checklist with a qualified assessor before your SafeMan credential is issued. A practical demonstration video slot is reserved in the online reader for every module.

MODULES

Module 1 — Statutory kit & secondary survey

What GN 156 expects in a workplace first aid kit and the head-to-toe secondary survey once life threats are controlled.

Key points

Kit per GN 156 Reg. 228: sterile dressings, bandages, cleansing, gloves, mouthpiece, first aid manual, incident register — sized to headcount.

Secondary survey: history, signs, symptoms; head-to-toe inspection for deformity, bleeding, tenderness.

Record vital signs and times — the handover is only as good as the log.

Consent, dignity and communication matter as much as technique.

Diagram: /assets/webp/sm-first-aid.webp

Practical video recording scheduled — follow the step-by-step illustrated checklist below.

Module 2 — Bleeding, burns & fractures

Catastrophic bleeding control, burn cooling rules and limb immobilization with the equipment you actually have.

Key points

Catastrophic bleeding: direct pressure, trauma dressing, tourniquet high and tight with the time written down when pressure fails.

Burns: cool with running water 10–20 minutes, no ice, no creams, clingfilm loosely lengthways.

Fractures: immobilize as found, splint across the joints above and below, sling for elevation.

Chemical burns: brush dry powder first, then flush 20+ minutes; electrical: isolate before touch.

Diagram: /assets/webp/sm-first-aid.webp

Practical video recording scheduled — follow the step-by-step illustrated checklist below.

Module 3 — Shock, environment & handover

Recognizing shock, the Namibian environmental trio (heat exhaustion, snakebite), and a clean patient handover.

Key points

Shock: pale, cold, clammy, fast weak pulse — lay flat, elevate legs unless injury forbids, keep warm, nothing by mouth.

Heat exhaustion: cool shade, sips of water, active cooling; confusion means emergency.

Snakebite: immobilize the limb, pressure immobilization bandage for neurotoxic bites, no cutting, no tourniquet, no sucking; carry the patient.

Handover: ATAMIST — Age, Time, And what happened, Mechanism, Injuries, Signs, Treatment given.

Diagram: /assets/webp/sm-first-aid.webp

Practical video recording scheduled — follow the step-by-step illustrated checklist below.

ASSESSMENT

Knowledge check

The closed-book knowledge check draws 12 questions from the bank reproduced in Appendix A. Pass mark 70%. Your SafeMan credential is issued after the knowledge check and the practicum sign-off, and remains valid for 24 months from issue.

Assessor Practicum Checklist — Workplace First Aid Level 1

Pass standard: All drills performed to assessor standard with correct sequencing and recording.

1	Direct pressure and trauma bandage application on a simulated limb bleed.	
2	Upper and lower limb fracture splinting with sling elevation performed correctly.	
3	Burn cooling and sterile non-adherent dressing applied without contamination.	
4	Shock positioning demonstrated with vital signs log completed accurately.	
5	Structured patient handover delivered using the site handover format.	

Assessor name, role/qualification and company are captured on the sign-off screen of the SafeMan platform and bound into the QR-verified certificate record.

APPENDIX A — QUESTION BANK

Knowledge check bank

Q1. First action for catastrophic limb bleeding:

A. Tourniquet immediately

B. Firm direct pressure

C. Elevation only

D. Cold water

Q2. Burn first aid is:

A. Ice packs

B. Cool running water 10–20 min

C. Toothpaste

D. Butter

Q3. A tourniquet note must record:

A. The shop where bought

B. Time of application

C. The victim's name twice

D. Nothing

Q4. Splinting spans:

A. Only the break

B. The joints above and below the fracture

C. The whole body

D. The hand only

Q5. Electrical burn rescue starts with:

A. Pulling the victim clear

B. Isolating the power source

C. Water

D. CPR

Q6. Shock positioning is generally:

A. Sitting up

B. Lay flat, elevate legs if no injury forbids

C. Walking it off

D. Prone

Q7. Chemical powder on skin: first brush off, then flush:

A. 5 minutes

B. At least 20 minutes

C. Until it stops stinging

D. Not at all

Q8. Snakebite management excludes:

A. Immobilizing the limb

B. Pressure immobilization for neurotoxic bites

C. Cutting and sucking the wound

D. Carrying the patient

Q9. Heat exhaustion first care:

A. Salt tablets

B. Cool shade and sips of water

C. Continue working

D. Hot shower

Q10. The secondary survey happens:

A. Before the primary

B. After life threats are controlled

C. At the hospital

D. Only for children

Q11. GN 156 first aid kits are sized by:

A. Budget

B. Number of employees and risk

C. Floor space

D. Manager's choice

Q12. A good casualty handover uses:

A. A story

B. A structured sequence such as ATAMIST

C. Shouting

D. A note left behind
