SafeMan Task HIRA, DSTI & Toolbox Talk Facilitator

SafeMan Task HIRA, DSTI & Toolbox Talk Facilitator — Theory + Graded Live HIRA Practicum. This SafeMan course is engineered for corporate audit readiness against: ISO 31000; NTA Unit Std 855; Labour Act 11 of 2007 s. 39–42.

REGULATORY DISCLOSURE — READ FIRST

SafeMan™ is a proprietary inter-organizational safety management and operational competency benchmark developed by Oryx Institute (safeman.oryxinstitute.org). Courses are engineered in alignment with ISO 45001:2018, ISO 14001:2015, ISO 31000, ILO-OSH guidelines, and pre-referenced against Namibia Training Authority (NTA) Unit Standards and Namibian Government Notice 156 of 1997 for corporate audit readiness. SafeMan credentials verify industry competency and attendance between organizations and are non-NQA credit-bearing.

How to use this module pack

Work through the modules in order. Each module states its focus and the key points you are expected to carry into practice. Diagrams referenced as web assets accompany the online reader at safeman.oryxinstitute.org. After the modules, sit the knowledge check: 10 questions, pass mark 70%, closed book.

This is a practicum course: after passing the knowledge check you must complete the assessor practicum checklist with a qualified assessor before your SafeMan credential is issued. A practical demonstration video slot is reserved in the online reader for every module.

MODULES

Module 1 — Hazard vs risk & the 5×5 matrix

Words matter: what a hazard is, what risk adds, and scoring consequence against likelihood honestly.

Key points

Hazard = the thing that can cause harm; risk = the chance and severity of that harm.

5×5: five consequence bands × five likelihood bands; the product bands the risk (Low / Medium / High / Extreme).

Score the realistic worst, not the common case; existing controls reduce residual risk, not the hazard.

Extreme stops work; High needs senior approval; Medium is controlled and monitored; Low is lived with.

Diagram: /assets/webp/sm-hira-matrix.webp

Practical video recording scheduled — follow the step-by-step illustrated checklist below.

Module 2 — Task HIRA & hierarchy of controls

The 5-step task assessment — break the job, find the hazards, control in order, communicate, monitor.

Key points

5 steps: break task into steps, identify hazards per step, rate risk, apply controls in hierarchy order, communicate and monitor.

Hierarchy: elimination, substitution, engineering, administrative, PPE — descending reliability.

Controls name an owner and a check; a control nobody verifies is a hope.

Reassess when conditions, people or equipment change — the paper does not expire the risk.

Diagram: /assets/webp/sm-hira-matrix.webp

Practical video recording scheduled — follow the step-by-step illustrated checklist below.

Module 3 — DSTI, toolbox talks & stop-work authority

Daily Safe Task Instructions and the 5-minute crew brief — plus the legal right to leave dangerous work.

Key points

DSTI: today's task, hazards, controls, PPE, emergency action — signed by the crew before work.

Toolbox talk: one topic, five minutes, two-way; test understanding with questions.

Labour Act s. 42: a worker may leave a dangerous workplace without penalty when reasonable.

Facilitation: stand where all can see, invite the quiet trades, close with the commitments.

Diagram: /assets/webp/sm-hira-matrix.webp

Practical video recording scheduled — follow the step-by-step illustrated checklist below.

ASSESSMENT

Knowledge check

The closed-book knowledge check draws 10 questions from the bank reproduced in Appendix A. Pass mark 70%. Your SafeMan credential is issued after the knowledge check and the practicum sign-off, and remains valid for 24 months from issue.

Assessor Practicum Checklist — Task HIRA & DSTI Facilitation

Pass standard: Graded written HIRA on a live scenario plus a facilitated crew brief.

1	5-step Task HIRA form completed on the assessed live work scenario with correct 5×5 scoring.	
2	Controls mapped in hierarchy order with owners and verification named.	
3	5-minute crew DSTI delivered covering task, hazards, controls, PPE and emergency action.	
4	Two-way interaction demonstrated: questions asked, understanding checked.	
5	Sign-off sheet completed and filed by the crew.	

Assessor name, role/qualification and company are captured on the sign-off screen of the SafeMan platform and bound into the QR-verified certificate record.

APPENDIX A — QUESTION BANK

Knowledge check bank

Q1. A hazard is:

A. The chance of harm

B. The thing with potential to cause harm

C. The injury

D. The fine

Q2. In a 5×5 matrix, 'Extreme' risk generally:

A. Proceeds with PPE

B. Stops the task until redesigned

C. Needs a signature

D. Is ignored

Q3. First choice in the hierarchy of controls:

A. PPE

B. Elimination

C. Training

D. Signage

Q4. A Task HIRA is refreshed when:

A. Annually

B. Conditions, people or equipment change

C. Never

D. When audited

Q5. A DSTI is signed:

A. By the manager only

B. By the crew before work starts

C. After the shift

D. By the client

Q6. Toolbox talks work best when:

A. They last 30 minutes

B. One topic, five minutes, two-way with questions

C. They read the policy

D. They blame workers

Q7. Labour Act s. 42 gives a worker the right to:

A. Extra leave

B. Leave a dangerous workplace without penalty when reasonably justified

C. Double pay for risk

D. Choose their PPE

Q8. Residual risk is scored:

A. Before controls

B. After existing controls are applied

C. By the client

D. Never

Q9. Consequence is scored on:

A. The common case

B. The realistic worst case

C. The best case

D. Last year's case

Q10. A control is complete when it has:

A. A poster

B. An owner and a verification check

C. A budget line

D. A meeting minute
