SafeMan Intro

SafeMan Intro — 1-Day Corporate HSE Sprint (8 Hours). This SafeMan course is engineered for corporate audit readiness against: ISO 45001:2018 Cl. 4–6; NTA Ref 1157; Labour Act 11 of 2007; GN 156 of 1997.

REGULATORY DISCLOSURE — READ FIRST

SafeMan™ is a proprietary inter-organizational safety management and operational competency benchmark developed by Oryx Institute (safeman.oryxinstitute.org). Courses are engineered in alignment with ISO 45001:2018, ISO 14001:2015, ISO 31000, ILO-OSH guidelines, and pre-referenced against Namibia Training Authority (NTA) Unit Standards and Namibian Government Notice 156 of 1997 for corporate audit readiness. SafeMan credentials verify industry competency and attendance between organizations and are non-NQA credit-bearing.

How to use this module pack

Work through the modules in order. Each module states its focus and the key points you are expected to carry into practice. Diagrams referenced as web assets accompany the online reader at safeman.oryxinstitute.org. After the modules, sit the knowledge check: 15 questions, pass mark 70%, closed book.

MODULES

Module 1 — Why safety management exists

The moral, legal and business case for managed safety, and how ISO 45001:2018 structures an occupational health and safety system through its high-level architecture.

Key points

ISO 45001:2018 follows the harmonized structure: context (Cl.4), leadership (Cl.5), planning (Cl.6), support (Cl.7), operation (Cl.8), evaluation (Cl.9), improvement (Cl.10).

Work-related injury and ill health are preventable; a managed system makes prevention routine rather than lucky.

Under Namibia's Labour Act 11 of 2007 the employer carries the primary duty of care; workers carry duties to cooperate and to report.

Cost of loss goes beyond medical bills: lost time, retraining, reputational damage and statutory exposure.

Module 2 — The PDCA safety cycle

Plan-Do-Check-Act as the operating rhythm of every ISO management system, mapped to the clauses a SafeMan practitioner will touch daily.

Key points

Plan: context, interested parties, OH&S risks and opportunities, objectives (Cl.4 and Cl.6).

Do: resources, competence, communication, operational control, emergency preparedness (Cl.7–8).

Check: monitoring, measurement, internal audit, management review inputs (Cl.9).

Act: nonconformity, corrective action, continual improvement (Cl.10).

Diagram: /assets/webp/sm-hira-matrix.webp

Module 3 — Hazard classes and duty of care

The major hazard families found on Namibian workplaces and the legal duty of care that attaches to every level of the organization.

Key points

Hazard families: physical, chemical, biological, ergonomic, psychosocial, and safety-mechanical.

GN 156 of 1997 (Regulations relating to the Health and Safety of Employees at Work) sets the working rules: first aid, PPE, machinery, confined spaces, noise and more.

Duty of care under Labour Act 11 of 2007: safe plant, safe systems, information, training, supervision, PPE at employer's cost.

Personal risk accountability: every worker owns the rule to stop unsafe work and report what cannot be controlled.

Diagram: /assets/webp/sm-extinguisher.webp

Module 4 — Personal risk accountability

Closing the sprint: the SafeMan personal discipline — task risk check, stop-work authority, and reporting that actually changes the workplace.

Key points

Before any task: what can hurt me, who else, and what has changed since the plan was written?

Stop-work authority is exercised respectfully and without fear of reprisal; a stopped job is a paid job.

Reports that name the hazard, the location and the proposed fix get closed out; reports that only complain do not.

Your SafeMan ticket is a personal record: keep it current, verify it with the QR code, know its expiry.

ASSESSMENT

Knowledge check

The closed-book knowledge check draws 15 questions from the bank reproduced in Appendix A. Pass mark 70%. Your SafeMan credential is issued after the knowledge check, and remains valid for 24 months from issue.

APPENDIX A — QUESTION BANK

Knowledge check bank

Q1. Which clause of ISO 45001:2018 deals with the 'Context of the organization'?

A. Clause 4

B. Clause 6

C. Clause 8

D. Clause 10

Q2. The primary legal duty of care for workplace safety in Namibia rests with the:

A. Employee

B. Employer

C. Safety rep

D. Client

Q3. Plan-Do-Check-Act: where do internal audits sit?

A. Plan

B. Do

C. Check

D. Act

Q4. GN 156 of 1997 is Namibia's:

A. Minimum wage code

B. Health and Safety of Employees at Work regulations

C. Companies Act

D. Environmental Act

Q5. Which is NOT one of the five hazard families taught in this sprint?

A. Physical

B. Chemical

C. Financial

D. Psychosocial

Q6. The correct response on finding an uncontrolled hazard you cannot fix is to:

A. Ignore it

B. Stop work and report it

C. Post a note

D. Wait for the shift to end

Q7. PPE under Namibian law is provided:

A. By the worker

B. At the employer's cost

C. Shared between shifts

D. Only for supervisors

Q8. ISO 45001's Plan phase includes:

A. Corrective action

B. OH&S risk and opportunity assessment

C. Internal audit

D. Management review

Q9. A SafeMan certificate verifies:

A. NQA credits

B. Industry competency and attendance

C. A trade test

D. Citizenship

Q10. 'Operational control' belongs to which ISO 45001 clause?

A. Cl. 5

B. Cl. 7

C. Cl. 8

D. Cl. 9

Q11. The cheapest and most effective point in the hierarchy of controls is:

A. PPE

B. Administration

C. Engineering controls

D. Elimination

Q12. Psychosocial hazards include:

A. Noise and vibration

B. Bullying and fatigue

C. Dust and fume

D. Sharp edges

Q13. Management review is an input-output loop that:

A. Replaces the audit

B. Evaluates the system's continuing suitability

C. Trains workers

D. Issues PPE

Q14. A near-miss should be reported because:

A. It is free information about failure of control

B. The law fines silence

C. It looks good in audits

D. Insurance requires it

Q15. SafeMan PDCA discipline says corrective action must:

A. Fix the paper trail

B. Address root cause, not symptom

C. Blame the worker

D. Wait for the next audit
