Why every course here ends in a venture

IN THIS ISSUE

The Oryx Directory

Feature: Why every course here ends in a venture 3
From the Directory: free crash courses 4

From the editor

Welcome to the fourth bulletin. This issue looks at how a course can end in something real, and lists the free guides now live in the Directory.

FEATURE

Why every course here ends in a venture

A venture proves the work in a way an examination cannot.

When we designed the first programmes, we asked a simple question: how would we know that a learner was ready? An examination tells you what someone remembers. A venture tells you what someone can do.

So every course now ends in a small venture. It might be a repaired machine, a priced quotation, a working prototype or a first paying client.

Partners tell us this is what they look for. A hiring manager can ask about a venture in an interview, and the answer is rarely rehearsed.

> *A venture tells you what someone can do.*

The approach is harder to run than an exam. It needs partners, tools and time. We think that is the point.

In the next bulletin we will follow three learners from their first workshop to their first invoice.

FROM THE DIRECTORY

Free crash courses, live now

Business Registration in Namibia

The steps, the offices and the order to do them in.

NQA and NTA Accreditation, Explained

What accreditation means and how a new institute applies.

Namibian Labour Law Basics

A plain-language guide for first-time employers.

Insurance in Namibia

What cover a small business needs, and what it can wait for.

Templates this month

- Invoice and quotation
- Non-disclosure agreement
- Meeting minutes
