SafeMan Core: Safety Management System

The flagship corporate safety ticket of the SafeMan by Oryx suite — the four modules, the timed examination and the verified credential, in one printable document.

5-DAY EQUIVALENT | 40 NOTIONAL HOURS | ISO 45001 · 14001 · 31000

1

What SafeMan Core is

SafeMan Core (SM-CORE) is the flagship programme of SafeMan by Oryx, the corporate safety-training suite of Oryx Institute. It is a SAMTRAC-equivalent, five-day-equivalent management-systems ticket built around three international standards: ISO 45001:2018 for occupational health and safety management, ISO 14001:2015 for environmental control, and ISO 31000 for risk management. A cohort that completes Core can read, run and audit a safety management system rather than only comply with one.

The programme carries 40 notional hours across four modules, closing on a timed examination sat in the student portal. Learners who pass are issued a numbered certificate and a PVC pass, both sealed with a QR code that anyone — an employer, an auditor, a client — can verify in seconds without an account or a database lookup.

Core is written for HSE managers, safety officers and supervisors: the people who own the system day to day. It is the five-day spine of the thirteen-ticket SafeMan catalogue; the other twelve tickets are one-to-two-day specialist programmes that attach to it.

> **BENCHMARK DISCLOSURE**
>
> SafeMan by Oryx is an inter-organizational industry safety benchmark aligned with ISO 45001:2018, ISO 14001:2015 and ISO 31000, and pre-referenced to NTA Unit Standards 846–858 and Namibian GN 156 of 1997 (non-NQA statutory credit). It is not an NQA-accredited qualification. SAMTRAC is a trademark of NOSA (Pty) Ltd; "SAMTRAC-style" and "SAMTRAC-equivalent" are comparative descriptors. For the government pre-certified pathway, enrol with the Oryx Safety Academy NQF track.

Course facts

FACT	VALUE
Course code	**SM-CORE** — SafeMan Core: Safety Management System
Duration	5-day equivalent
Notional hours	40

FACT	VALUE
Standards alignment	ISO 45001:2018 · ISO 14001:2015 · ISO 31000
Statutory pre-references	NTA Unit Standards 846–858 · GN 156 of 1997 (Namibia)
Modules	4 (C1–C4)
Examination	8 questions · 10 minutes · pass mark 7 of 8
Credential	Numbered certificate + PVC pass, QR-verified
Delivery modes	Individual registration · corporate cohort (in-house) · corporate cohort (public class)
Materials licence	Creative Commons Attribution 4.0 International

3

The four modules

Four modules carry a cohort from the ISO 45001 clause map to an audited environmental register. Each module pairs the standard's language with the artefact it produces — a legal register, a BowTie diagram, a permit workflow, an aspects-and-impacts register — so the system is built on paper while it is taught.

The OHS management system architecture

MODULE C1

Plan-Do-Check-Act applied to ISO 45001:2018: context of the organisation, worker participation, documented information, and the legal register as the system's foundation.

- ISO 45001 clause map 4–10
- Legal & other requirements register
- Worker consultation obligations
- Documented information control

ISO 31000 risk & BowTie barrier thinking

MODULE C2

Risk assessment methodology from context to treatment. BowTie diagrams make threats, top events, consequences and preventive/recovery barriers explicit and auditable.

- Risk appetite & criteria
- BowTie: threat — top event — consequence
- Preventive vs recovery barriers
- Barrier health monitoring

Contractor & e-PTW governance

MODULE C3

Managing contractor safety from pre-qualification to demobilisation: safety file review, mutual responsibility matrices, and electronic permit-to-work workflows.

- Pre-qualification criteria
- Safety file review checklist
- e-PTW workflow & authorities
- Handover & close-out

ISO 14001 environmental control & auditing

MODULE C4

Environmental aspects/impacts registers, waste hierarchy, emergency preparedness for spills, and internal audit programmes aligned to ISO 45001 and ISO 14001 clause 9.

- Aspects & impacts register
- Waste hierarchy 4Rs
- Spill response preparedness
- Internal audit & MOC

4

The timed examination

The examination is sat in the SafeMan student portal, under a live countdown, and is drawn fresh from the question bank on every attempt. Eight questions in ten minutes; the pass mark is seven of eight. Questions are drawn from the four modules' own territory — the clause map, the BowTie, the permit workflow and the environmental register — so a pass means the material was absorbed, not memorised.

FORMAT	VALUE
Questions per paper	8
Time limit	10 minutes, enforced by the portal clock
Pass mark	7 of 8
Draw policy	Fresh draw from the bank each attempt
Where it runs	SafeMan student portal, with a cohort access code

> **EXAM INTEGRITY**
>
> The live question bank is not published. This handbook and the exam blueprint describe the structure, timing and marking of the paper — never the questions themselves.

5

The credential

A pass issues two documents on the spot: a numbered A4 certificate and a wallet-sized PVC pass, both signed by Tangi Iigonda, Principal & Founder of Oryx Institute. SafeMan serials run in the SM-2026-NNNN series and record the learner's name, the course code and the issue date.

Every credential carries a QR code that encodes its payload and an HMAC-SHA256 signature. Scanning it opens the public verification page, which recomputes the signature and states plainly whether the document was issued by Oryx Institute — no account, no database, arithmetic-level trust. Employers and auditors can verify a SafeMan pass as easily as reading it.

6

Delivery and enrollment

Enrollment requests go to the registrar at Oryx Institute by email. The registrar replies with cohort dates, the invoice and a portal access code for each learner — no accounts are created and no passwords are remembered. The three registration modes below cover a single professional booking a seat and a company putting a whole cohort through the ticket.

Individual Registration

One learner, one seat, a scheduled public intake.

Corporate Cohort (in-house)

The ticket runs at your site, for your team, on your calendar.

Corporate Cohort (public class)

Your team joins a scheduled public intake.

Access codes follow the cohort format issued by the registrar (for example ORYX-2026). Learners sign into the student portal with their name and code, study the module material, sit the timed examination and download their certificate and PVC pass from the same room.

7

The thirteen-ticket catalogue

Core is the five-day spine of a thirteen-ticket suite grouped in four families: emergency practicums, sub-protection tickets, hygiene & exposure, and management systems. Every ticket closes on the same timed-examination and QR-verified credential chain as Core.

CODE	TICKET	DURATION	HRS
SM-CORE	SafeMan Core: Safety Management System ISO 45001:2018 · ISO 14001:2015 · ISO 31000 · NTA Ref 846–858	5-day equiv.	40
SM-CPR	Basic Life Support, CPR & Choking Pre-ref: NTA ID 843 & 844 · GN 156 Reg. 228	1 day	8
SM-FA1	Workplace First Aid Responder Pre-ref: NTA ID 843 & 844 · GN 156 First Aid Regs	2 days	16

CODE	TICKET	DURATION	HRS
SM-FIRE	Basic Firefighting & Fire Marshal Pre-ref: NTA ID 1763 & 1157 · Fire Brigade Act 5 of 2006	1 day	8
SM-WAH	Working at Heights & Fall Arrest Pre-ref: GN 156 Reg. 39–45 · NTA ID 849	1 day	8
SM-CSE	Confined Space & Gas Testing Pre-ref: GN 156 Reg. 163 · NTA ID 848	1–2 days	10
SM-LOTO	Lockout / Tagout Energy Isolation Pre-ref: GN 156 Machinery Regs · NTA ID 2061	1 day	8

SM-INC	Incident Investigation & ICAM ISO 45001 Cl. 10 · ICAM (BHP-adapted) · Labour Act reporting	1 day	8
SM-ENV	Environmental Awareness & Waste Control ISO 14001:2015 · EMA Act 7 of 2007 · Basel conventions	1 day	8

8

The Oryx dual-track

SafeMan by Oryx is the corporate, industry-benchmark track. Its sister programme, the Oryx Safety Academy, is the vocational spine pre-referenced to NTA Unit Standards and Namibian GN 156 of 1997 ahead of formal NQA accreditation, running from Level 1 site foundation to Level 7 strategic EHS. Organisations that want the government pre-certified pathway enrol with the Academy; organisations that want a fast, verified corporate benchmark run SafeMan tickets. Many run both.

LEVEL	ACADEMY PROGRAMME	HRS
NQF L1	Foundation Workplace Health & Safety	70

LEVEL	ACADEMY PROGRAMME	HRS
NQF L2	Workplace SHE Representative & Risk Control	100
NQF L3	Supervisory OHS & Environmental Responsibility	120
NQF L4	National Vocational Certificate in OHS	140
NQF L5	National Vocational Diploma in OHS Management	160
NQF L6	Diploma in Applied OHS Instrumentation & Hygiene	160
NQF L7	Advanced Diploma in Strategic EHS, PSM & ESG	180
